Python For Data Science Cheat Sheet Jupyter Notebook

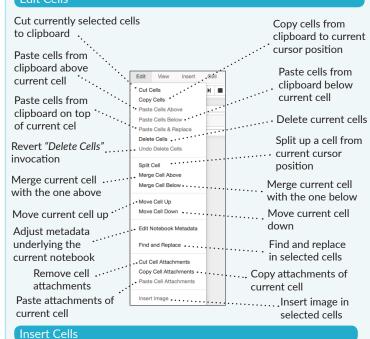

Writing Code And Text

Add new cell above the

current one

Code and text are encapsulated by 3 basic cell types: markdown cells, code cells, and raw NBConvert cells.

Edit Cells

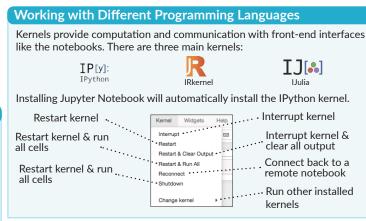

Cell

Insert Cell Relow

Add new cell below the

current one

Widgets

Notebook widgets provide the ability to visualize and control changes in your data, often as a control like a slider, textbox, etc.

You can use them to build interactive GUIs for your notebooks or to synchronize stateful and stateless information between Python and JavaScript.
